By: *Pouv Sopheak*
IT Manager
MEDICAM

2011

Content

1. Objective	1
2. Open FTI mapping	
3. Filter Data by Organization	
4. Filter data by FTI Intervention	
5. Filter Data by Geographic Area	

I. Objectives of FTI Mapping system

- a. To map NGOs interventions regarding Fast Track Initiative and Child Survival 12 Score Card interventions in order to understand “ Who’s doing What and Where” and if possible it is also useful to understand NGOs’ financial contribution in the interventions of FTI and 12 Score Card.
- b. Knowing where and what NGOs are doing will enable policy makers and other health partners to better understand the gaps needed to accelerate the implementation of FTI and CS 12 Score Card interventions so as to meet Cambodia Millennium Development Goal (CMDG) 4,5.
- c. The mapping information will also be useful for avoiding duplication of implementation among partners.

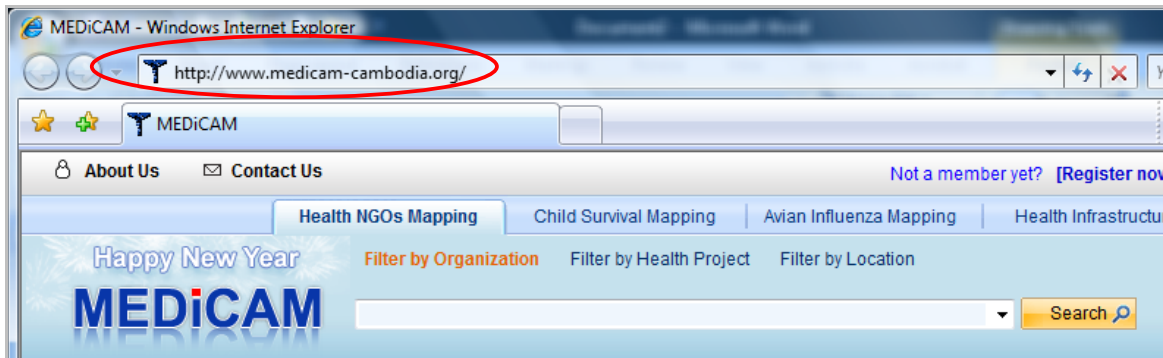

II. Open FTI Mapping System

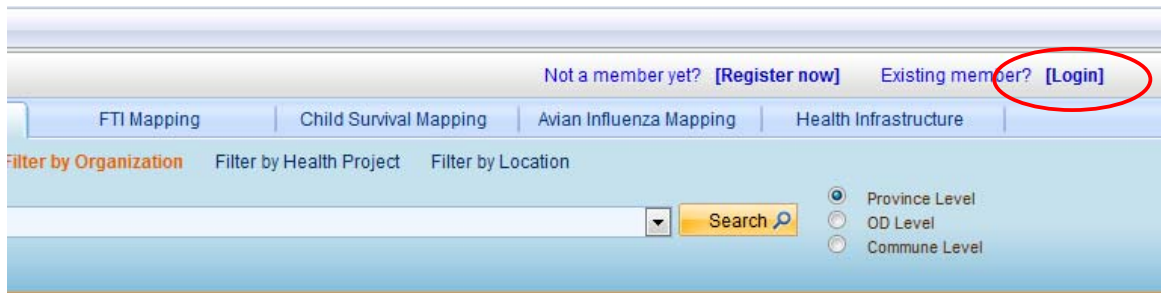

Be informed that before you can access to FTI Mapping, you have to be our online members

❖ For Existing MEDiCAM online member

1. Open internet browser (eg. Internet Explorer, Mozilla Firefox...etc.)
